

Forbes Marshall

Energising Businesses and Communities Worldwide

RFQ-Service hub

❗ Problem Statement

Sales engineers currently rely on manual processes, physical user manuals, and individual past experience to troubleshoot Forbes Marshall products on-site.

This creates a critical bottleneck, as field engineers lack immediate, independent access to centralized product histories and technical documentation, forcing an inefficient dependency on the backend service team during time-sensitive customer visits.

🌀 Objective

To drastically reduce on-site troubleshooting and resolution times for Forbes Marshall products by equipping sales engineers with an updated, independent digital knowledge bank—providing instant, mobile-ready access to product histories and technical documents without relying on the backend service team.

Proposed Inputs

- **Direct Text:** Typing via a keyboard, pasting text, or entering product FG code (eg CX2000) .
- **Voice Commands:** Audio input processed via Automatic Speech Recognition (ASR).
- **Images & Video:** Visual data processed via computer vision (e.g., photos, documents, live camera feeds).

Examples of inputs given

Direct Text / Voice

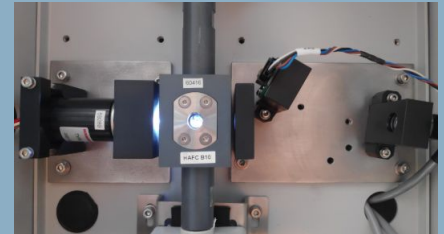

What is the overall count
Of complaints for
CX2000 for this year?

Image + Text

What is this product and
how does it work ?

Image + Text + voice

Identify these internal
components of CX2000

Eg 1: I/p - Direct Text / Voice

Output

What is the overall count
Of complaints for
CX2000 for this year?

Input

The Overall Count of complaints is
200 globally.

Would you like to know branch wise
breakdown ?

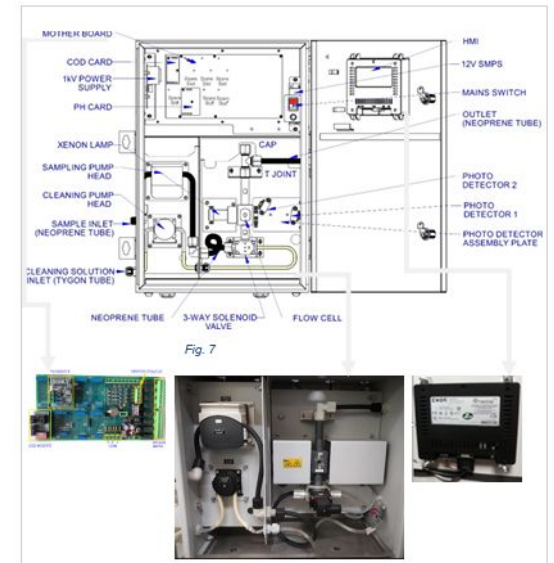

Eg 2: I/p - Direct Text/Voice & O/p - Image & Text

Output

Give the Internal Layout of
CX2000

Input

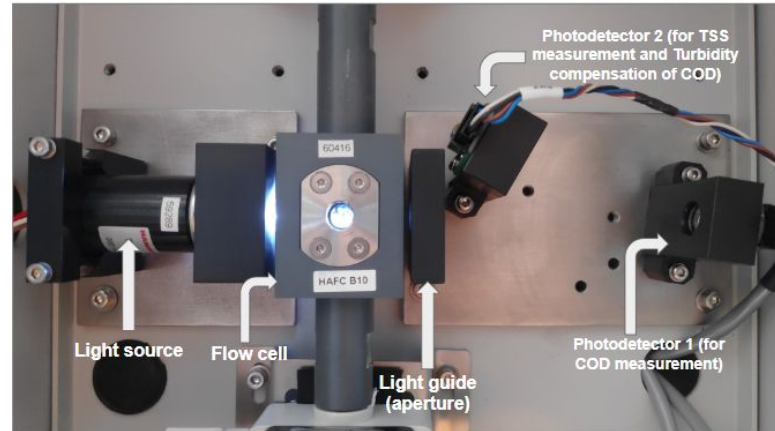

The internal
Layout of CX2000
is as follow

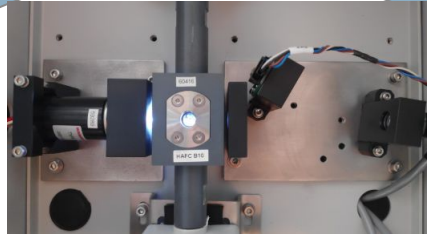

Eg 3: I/p - Direct Text , Voice & Image

Output

The Product Details are as follow

Input

Identify these internal components of CX2000

Eg 4: I/p - Direct Text & Image

What is this product and how does it work ?

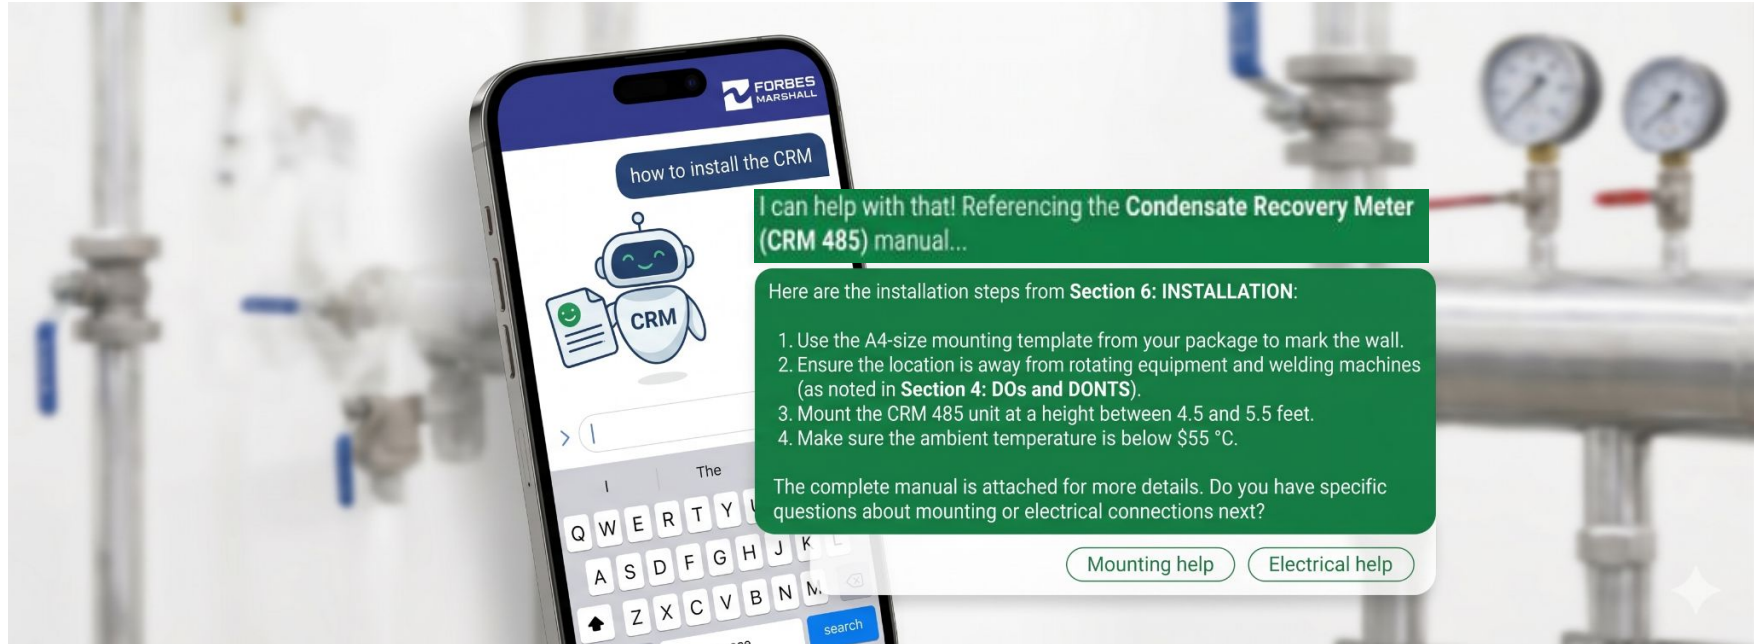

Input

Output

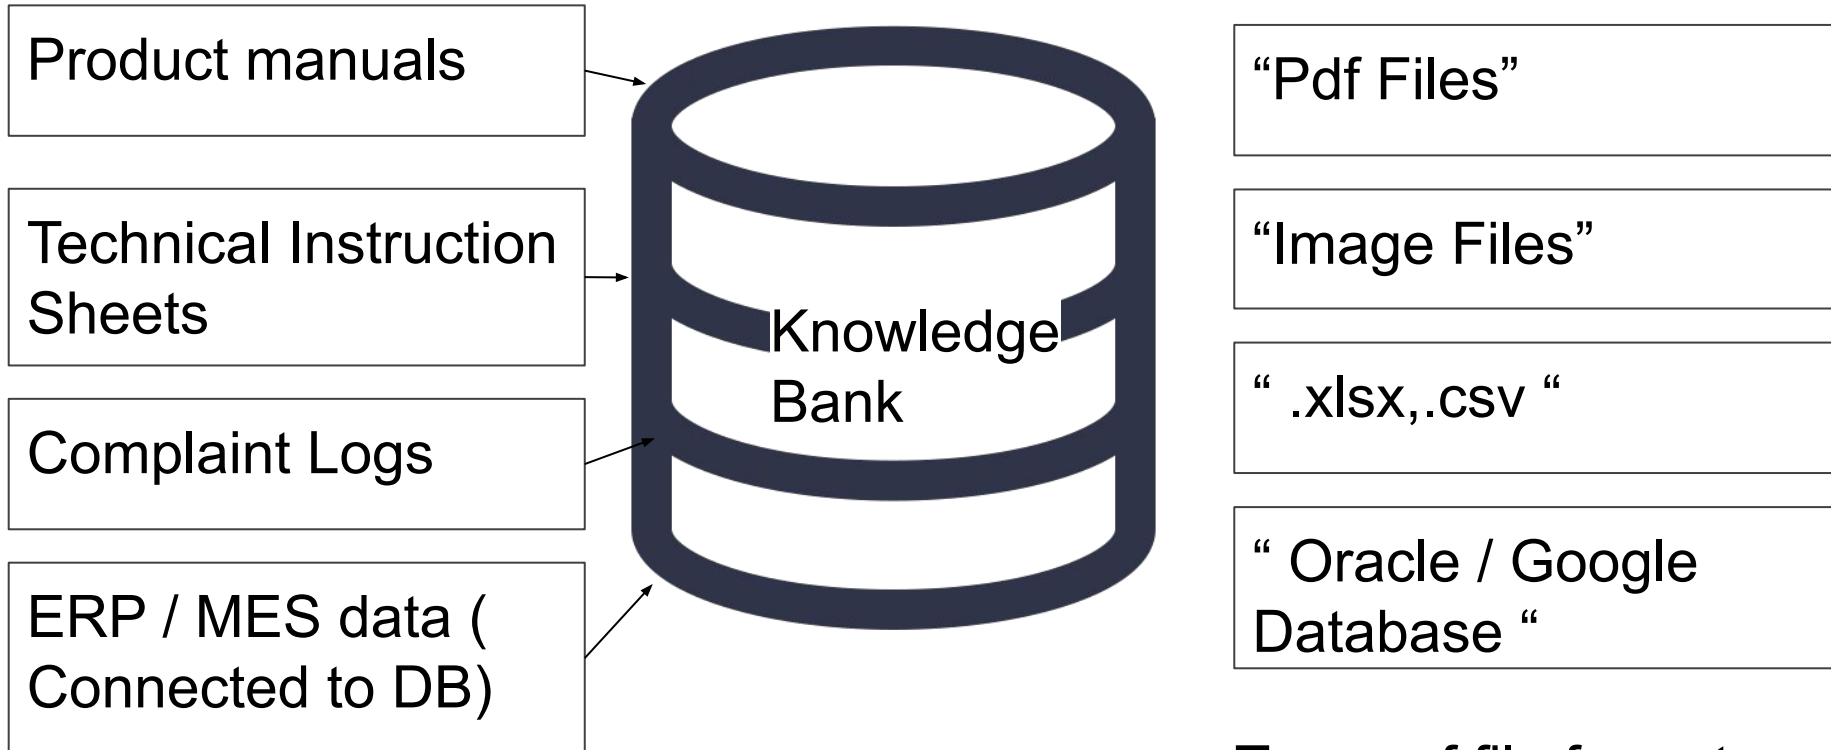

The Product is CX2000 it is an on-line continuous multi-parameter water quality monitoring effluent analyser. Manufactured by Forbes Marshall, it is a single-stream online system designed to monitor and measure critical water quality parameters simultaneously.¹²

Sample Of Final Output

Data Sources from FM

- **Accuracy & Alignment:** Answers must strictly conform to the source documents in the knowledge bank.
- **Missing Data Protocol:** If no information is available, state exactly: *"insufficient information to proceed further with analysis"*.
- **Conciseness:** Keep all information short, precise, and to the point.
- **Visual Support:** Include relevant images only when required and explicitly supported by the knowledge bank documents.
